Hilton	McLean VA	Hospitality AI
Marriott	Bethesda MD	Hospitality AI
Markel	Richmond VA	
CarMax	Richmond VA	
Genworth	Richmond VA	
AstraZeneca	Gaithersburg MD	
Tenable	Columbia MD	

Generally skip: defense and federal contractors

Booz Allen Hamilton, Leidos, SAIC, CACI, ManTech, Lockheed Martin, Northrop Grumman, General Dynamics, RTX, BAE Systems, MITRE, Peraton, and the federal arms of Deloitte (GPS) and Accenture (Federal Services). Most of their AI roles need a security clearance or US-person status for export control, which rules out H-1B.

Visa notes for 2026

- Tech companies took the top spots in FY2025 H-1B approvals for the first time, led by Amazon, Meta, Microsoft and Google.

- Already on H-1B? A job change is a transfer: no lottery, and the $100,000 fee does not apply when the beneficiary already holds H-1B status. Exception: a change-of-employer petition that requests consular processing may trigger it.
- New cap cases go through a wage-weighted lottery (effective Feb 27, 2026), which favors higher-paid positions.
- To verify a company for your role, search its filings for "Machine Learning Engineer" or "AI Engineer" in the USCIS H-1B Employer Data Hub or LCA sites such as MyVisaJobs or H1BGrader. Recent filings for your exact title are the best signal.
- Startups: ask about sponsorship and green card (PERM) policy in the first recruiter call, before investing in interviews.
